Respected Editor,

I am writing to request consideration for publication of my article, "PROACTIVE PREDICTION OF UPI TRANSACTION FAILURE USING MACHINE LEARNING ON SYNTHETIC DATA" in your esteemed journal. I believe the content aligns with your journal's scope and will be of interest to your readers.

The article is original, unpublished, and not submitted elsewhere. I have attached the manuscript for your review.

Please let me know if you require any additional information.

Thank you for considering my submission.

Best regards,
Priyam Aggarwal

Dear Priyam Aggarwal and Dr. Ajay Kumar
The paper titled "*PROACTIVE PREDICTION OF UPI TRANSACTION FAILURE USING MACHINE LEARNING ON SYNTHETIC DATA*" presents a timely and relevant contribution to the field of digital payments and predictive analytics. The study addresses a critical challenge in the Indian fintech ecosystem by proposing machine learning models to proactively identify potential UPI transaction failures, thereby enhancing reliability and user trust. The use of synthetic data is justified due to privacy concerns, though the paper would benefit from a deeper discussion on how closely this data replicates real-world transaction behavior. The methodology is clearly explained, and the results demonstrate promising accuracy; however, the inclusion of additional evaluation metrics such as AUC-ROC and F1-score, along with broader algorithmic comparisons, would strengthen the findings. The paper is well-structured, with a logical flow from literature review to experimentation, though expanding the review to include recent works from 2023–2025 would improve contextual grounding. Practical implications for banks, payment gateways, and regulators are briefly mentioned but could be elaborated further to highlight real-world applicability. Overall, the manuscript is innovative, relevant, and methodologically sound, and I recommend **acceptance** for publication in the May 2026 issue of IJMIE (ISSN: 2249-0558, IF: 7.119).

Thank you
